### Headnote

This article summarises the key points of the UCP Directive and the way it is implemented in the Dutch Civil Code. The authors state that the provisions contain very broad norms on the one hand, while -- on the other hand -- they are somewhat limited due to the many exceptions that are made, as well as the fact that B2B relations are not taken into account.

In the authors' opinion, the Dutch legislator's implementation plan will lead to discussions about the question whether a certain commercial practice falls within the scope of the provisions, which will lead to legal uncertainty.
