Land registers

Land registers are a very important source of information due to their legal nature.

Land registers help to facilitate land-related administrative tasks of citizens, legal professionals, state authorities, private companies and other interested parties. The official register information is open (in a majority of EU countries) to banks, creditors, business partners and consumers in order to enhance transparency and legal certainty in European Union markets.

Please consult relevant subpages to find more information on the [land registers at European level](#) and [national land registers](#).
