The European Case Law Identifier (ECLI) has been developed to facilitate the correct and unequivocal citation of judgments from European and national courts. A set of uniform metadata will help to improve search facilities for case law.

Before ECLI, it was difficult and time-consuming to find relevant case law. Take, for example, a case where a ruling of the Supreme Court of Member State A was known to be of interest for a specific legal debate. The case was registered in various national and cross-border case law databases, but in each database the ruling had a different identifier. All these identifiers – if known at all – had to be cited to enable readers of the citation to find the case in the database of their preference. Different citation rules and styles complicated the search. Moreover, users had to go to all the databases to find out whether this Supreme Court case was available – summarised, translated or annotated. With the ECLI system one search via one search interface using just one identifier will suffice to find all occurrences of the ruling in all participating national and cross-border databases.

Easy access to judicial decisions of other Member States is of growing importance in reinforcing the role of the national judge in applying and upholding EU law. Searching for, and citation of judgments from other Member States is seriously hampered by differences in national case law identification systems, citation rules and technical fields describing the characteristics of a judgment.

To overcome these differences and to facilitate easy access to - and citation of - national, foreign and European case law, the Council of the European Union invited Member States and EU institutions to introduce the European Case Law Identifier (ECLI) and a minimum set of uniform metadata for case law.

Main characteristics of ECLI
ECLI is a uniform identifier that has the same recognizable format for all Member States and EU courts. It is composed of five, mandatory, elements: ‘ECLI’: to identify the identifier as being a European Case Law Identifier; the country code; the code of the court that rendered the judgment; the year the judgment was rendered; an ordinal number, up to 25 alphanumeric characters, in a format that is decided upon by each Member State. Dots are allowed, but not other punctuation marks.

The elements are separated by a colon. A (non-existent) example of an ECLI could be:
ECLI:NL:HR:2009:384425, which could be decision 384425 of the Supreme Court (‘HR’) of the Netherlands (‘NL’) from the year 2009.

Metadata
To make it easier to understand and find case law, each document containing a judicial decision should have a set of metadata as described in this paragraph. These metadata should be described according to the standards set by the Dublin Core Metadata Initiative.

The Council Conclusions on ECLI give a description of the metadata that can be used.

ECLI coordinator
Every Member State using ECLI must appoint a governmental or judicial organisation as the national ECLI coordinator. The National ECLI coordinator is responsible for establishing the list of codes for the participating courts, the publication of the way the ordinal number is made up, and all other information that is relevant for the functioning of the ECLI system. The ECLI co-ordinator for the EU is the Court of Justice of the European Union.

Each Member State decides whether, and to what extent - it will use the ECLI system, e.g. if it will apply it retroactively to historical records or the number of courts participating, for example only at supreme court level, all courts, etc.

European and international dimension
By clicking on the EU and international flags available at the right hand side, you will find information on implementation of ECLI by the Court of Justice of the European Union and the European Patent Office.

In accordance with the Council conclusions the European Commission has developed a multi-lingual ECLI search engine which allows users to find judicial decisions from the databases of those case law publishers who have implemented the ECLI standard and provided us with access to their data. An ECLI resolver is also available at https://e-justice.europa.eu/ecli/ - any ECLI typed after this path will display the relevant ECLI metadata (if available). For example https://e-justice.europa.eu/ecli/ECLI:NL:HR:2016:764 would directly display the metadata of decision ECLI:NL:HR:2016:764.

Member State pages
On the Member State pages you can find information on:
whether the Member State has already introduced ECLI and metadata;
if not: whether it is planning to do so;
if yes: information on court codes, formatting rules, metadata and so on;
the national ECLI coordinator.

Please select the relevant country's flag to obtain detailed national information.

The European Case Law Identifier (ECLI) of the European Union is the ECLI coordinator for the Union jurisdictions.

Country code
The "country code" for the Court of Justice of the European Union to be used in the second element of the ECLI is: [EU]

Generation of ECLI
Components of the ECLI to identify decisions of the Court of Justice of the European Union:
ECLI abbreviation
Country code: EU
Court code: C = Court of Justice
T = General Court
F = Civil Service Tribunal

Year when the decision was rendered (format YYYY)
Ordinal number composed of:
Serial number of the decision per jurisdiction per year

Examples:
ECLI:EU:C:1998:27 is the 27th document of the Court of Justice with an ECLI in 1998
ECLI:EU:T:2012:426 is the 426th document of the General Court with an ECLI in 2012
ECLI:EU:F:2010:80 is the 80th document of the Civil Service Tribunal with an ECLI in 2010

European Patent Office

The European Patent Office (EPO) offers inventors a uniform application procedure which enables them to seek patent protection in up to 40 European countries. Supervised by the Administrative Council, the Office is the executive arm of the European Patent Organisation.

Coordination of ECLI in the European Patent Office is carried out by the Publication Department.

Country code
The country code for the European Patent Office to be used in the second element of the ECLI is: [EP]

Generation of national ECLI
Components of the ECLI to identify decisions of the Boards of Appeal of the European Patent Office:

ECLI abbreviation
Country code: EP
Court code: BA (BA = Boards of Appeal of the European Patent Office)
Year when the decision was rendered (format YYYY)

Ordinal number composed of:

Decision case number (original case number without the slash). Composed of 7 digits -- 1 digit (type of decision) + 4 digits (ordinal number of the decision) + 2 digits (last two digits of the year of filing).

Codes for the type of decisions at the EPO:
D : Disciplinary Board of Appeal
G : Enlarged Board of Appeal
J : Legal Board of Appeal
T : Technical boards of appeal
W : decisions on protest cases
R : decisions on petitions for review

A dot
Date of the decision (format YYYYMMDD)

Example:
EP= European Patent Office
BA= Boards of Appeal of the European Patent Office
2002 - year in which the decision was rendered (example)
D000300= D0003/00 (decision case number)
20020503 = 2002.05.03 (date of the decision)

Use of the ECLI
The ECLI is used to uniquely identify decisions of the Boards of Appeal of the European Patent Office.

Search by ECLI is enabled via the EPO Board of Appeal decisions database (see link below)

European Case Law Identifier (ECLI) - Belgium

National ECLI Coordinator
The central services of the Federal Public Service Justice (SPF Justice – info@just.fgov.be) act as national coordinator for Belgium.

Country code
ECLI country code for Belgium: [BE]

Generation of national ECLI
ECLI indexation was activated in October 2017.
Case-law:
Court of Cassation,
Courts of Appeal,
Labour courts (Cour du travail/Aarbeidshof):
Courts of first instance
Commercial courts,
Labour tribunals (Tribunal du travail/Arbeidsrechtbank):
registered in the JUPORTAL public database of Belgian case-law, is also available via the ECLI search engine.
The ECLI number is composed of the following: ECLI:BE[court code][year of the decision]:[serial number]
The ordinal number is in two parts, separated by a point:
'decision type' code:
ARR for judgments/rulings,
CONC for Public Ministry findings,
DEC for judicial decisions,
ORD for orders,
AVIS for opinions.
A serial number.
Until mid-November 2019, this serial number comprised the decision date format YYYYMMDD (year-month-day) followed by a point and a sequence number. From mid-November 2019, the serial number of the judgments and findings of the Court of Cassation also contain information on the chamber where the case was heard. The serial number format is YYYYMMDD (year-month-day) followed by a point, the chamber code, another point and a sequence number. The full ECLI of a conclusion of the Public Prosecutor’s Office of the Court of Cassation for a case in which a judgment was delivered on 6 May 2010 is as follows: ECLI:BE:CASS:2010:CONC.20100506.5
For example, the full ECLI of a judgment of the Court of Cassation of 30 October 2020 is as follows: ECLI: BE: CASS: 2020: ARR.20201030.1N.4
If you are looking for a decision and you already know its ECLI number, you can access the specific page containing details of the decision directly using the following URL: https://juportal.be/content/<numéro ECLI>.
For example, you will find the detailed pages of the ECLI numbers given as an example at the following addresses:

Court code:
Belgium has a large number of jurisdictional codes. The code list for Belgian courts can be found in the attached table (276 Kb).
Belgium’s judicial landscape was redesigned on 1 April 2014. The attached table shows the names of the courts before and after the reform of 1 April 2014.

European Case Law Identifier (ECLI) - Bulgaria

National ECLI coordinator
The national ECLI coordinator is:
Supreme Judicial Council (SJC)
Ul. Ekrzah Yosif 12,
Sofia 1000,
Bulgaria
Web: http://www.vss.justice.bg vss@vss.justice.bg

Country code
The country code for Bulgaria is: BG

Creation of a national ECLI
An ECLI is generated for each court decision that is published on the central web-based interface for case law (https://legalacts.justice.bg/). The portal is maintained by the Bulgarian ECLI coordinator, the Supreme Judicial Council. The ECLI syntax is specified in Chapter Seven of Regulation No 4 of 16 March 2017 on keeping, storing and accessing the register of court documents.
The ECLI consists of the following components:
The abbreviation ‘ECLI’
The country code ‘BG’
The court code, consisting of two parts:
The type of court (2 capital letters):
‘CC’ designates the Constitutional Court
‘SC’ designates the Supreme Court of Cassation
‘SA’ designates the Supreme Administrative Court
‘PA’ designates the Specialised Criminal Court of Appeal
‘PC’ designates the Specialised Criminal Court
‘MA’ designates the Military Court of Appeal
‘MC’ designates Military Courts
‘AP’ designates Courts of Appeal
‘AD’ designates Administrative Courts
‘DC’ designates Provincial Courts
‘RC’ designates District Courts

Numerical court code (3 digits):
‘000’ is the number of the Constitutional Court
‘001’ is the number of the Supreme Court of Cassation
‘002’ is the number of the Supreme Administrative Court

The codes of all other courts are set out in Annex 9 to the Rules on Administration in Courts[1]

Examples:
‘CC000’ is the code of the Constitutional Court
‘SC001’ is the code of the Supreme Court of Cassation
‘SA002’ is the code of the Supreme Administrative Court
‘AP500’ is the code of the Plovdiv Court of Appeal
‘DC530’ is the code of the Plovdiv Provincial Court
‘RC533’ is the code of the Plovdiv District Court

Table 1 below lists the codes of all courts used in the third component of the ECLI.

Year of the court decision in the ‘YYYY’ format
4 digits indicating the year of the case
2 digits indicating the code of the case type. These codes are specified in Article 80(2) of the Rules on Administration in Courts – see Table 2 below
5-digit number of the case for the relevant year
3-digit number of the court decision in the specific case

Example of an ECLI of a Bulgarian court decision

ECLI:BG:DC530:2017:20160100630.001
BG = Bulgaria
DC530 = Plovdiv Provincial Court
2017 = Year of court decision
20160100630.001 = First decision of the Plovdiv Provincial Court in a first-instance civil case with number 630 of 2016.

**Generation of national ECLI (ECLI syntax)**

The ECLI identifier has been used in the Czech Republic since April 2012 to designate judgments of the Supreme Court (Nejvyšší soud) and since March 2014 to designate judgments of the Constitutional Court (Ustavní soud). The ECLI identifier is currently being implemented at high court and regional court levels. Judgments designated with the ECLI identifier are also searchable using the identifier on court websites (judgments of the Supreme Court at https://nsoud.cz/ and judgments of the Constitutional Court at http://nalus.usoud.cz/).

**Country code**

[CZ]: country code for the Czech Republic.

**Court codes**

[NS]: Nejvyšší soud (Supreme Court of the Czech Republic).

[US]: Ustavní soud (Constitutional Court of the Czech Republic).

**Example of ECLI identifier for Czech court decisions**

ECLI:CZ:NS:2012:[case number].1

- **[CZ] country code** (CZ for the Czech Republic);
- **[NS]** is the code of the court that issued the judgment (NS for the Supreme Court - Nejvyšší soud);
- **[2012]** indicates the year the judgment was rendered;
- **[case number]** does not contain spaces or forward slashes; these are replaced by full stops;

The number [1] is the ordinal number of a decision with the same case number. Inclusion of the ordinal number ensures that the same ECLI identifier is not used to designate more than one judgment from one court in the same year.

Introduction and spread of the ECLI in Germany
In Germany, the Federal Constitutional Court (Bundesverfassungsgericht), the Federal Court of Justice (Bundesgerichtshof), the Federal Administrative Court (Bundesverwaltungsgericht), the Federal Fiscal Court (Bundesfinanzhof), the Federal Labour Court (Bundesarbeitsgericht), the Federal Social Court (Bundessozialgericht) and the courts of the Länder have introduced the ECLI into their databases of decisions. An ECLI is allocated to all decisions published on their respective websites since the ECLI was introduced. For details, see:

Federal Constitutional Court
http://www.bundesverfassungsgericht.de (there are plans to retroactively allocate ECLIs to all published decisions);
Federal Court of Justice
http://www.bundesgerichtshof.de (for decisions published on the website of the Federal Constitutional Court since 1 January 2016);
Federal Administrative Court
http://www.bundesverwaltungsgericht.de (for all decisions published on the website of the Federal Administrative Court);
Federal Fiscal Court
http://www.bundesfinanzhof.de (for decisions published on the website of the Federal Fiscal Court since 4 October 2016);
Federal Labour Court
http://www.bundesarbeitsgericht.de (for decisions dated after 1 January 2015);
Federal Social Court
http://www.bundessozialgericht.de (for decisions published on the website of the Federal Social Court since 1 January 2010);

You can also use the EU ECLI search engine to search for Federal Constitutional Court and Federal Administrative Court decisions to which an ECLI has been allocated.

Structure of ECLIs
General
ECLIs have five components. Each component is separated from the others by a colon. ECLIs allocated by Germany always start with ECLI () followed by DE for Germany (). The third component, known as the court code (), shows which court took the decision (e.g. BVerfG for the Federal Constitutional Court). The fourth component () indicates the year in which the decision was taken and consists of a four-digit sequence (in the format yyyy, e.g. 2016). The courts generate the final component, known as the ordinal number ( and upwards), according to their own individual rules. The court codes and ordinal numbers used by each court are explained separately below.

Details for individual courts
Federal Constitutional Court
The court code () is always BVerfG. The ordinal number consists of parts to . The second-last and last parts are separated by a point. The exact components of the ordinal number are explained in detail below.

Type of procedure:
b Finding that one or more parties have acted unconstitutionally
c Appeal against a ruling in an electoral dispute
e Dispute resolution proceedings between constitutional bodies
f Abstract judicial review
g Federal Government / Länder disputes
h Other disputes between the Federal Government and the Länder
k Disputes concerning the constitution of a Land
l Substantive judicial review
m Review of international law as Federal law
n Interpretation of the Basic Law following referral by the constitutional court of a Land
o Decisions on other matters referred to it by Federal Act
q Interim measures
r Constitutional complaints
up Full-court decisions
vb Complaints regarding judicial delay

Abbreviations for court formations: k for decisions of a Chamber or s for decisions of a Senate (division) (not for full-court cases or complaints regarding delay; in these cases, the court formation is implicitly indicated by the abbreviations up and vb).

Exact date of decision in the format yyyymmdd.
Optional: an additional distinguishing character (assigned in alphabetical order from a to z). This is used when decisions are handed down by the same court with the same date and file reference (e.g. same date and file reference given for the extension of an interim order and the decision on the substance of the case). A distinguishing character is only added if it is necessary to prevent the allocation of ambiguous ECLIs.
Main file reference (consisting of the division identifier, the register reference, the entry number and the year of entry in the format yy). There are no spaces between the division identifier and the register reference, nor between the register reference and the entry number. The slash between the entry number and the year of entry is also omitted from the ECLI. The entry number is always shown as a four-digit number in an ECLI. If necessary, leading zeros are inserted before the entry number. The last two digits therefore always represent the year of entry.

Example:
The ECLI for the decision of the Second Division of the Federal Constitutional Court of 1 March 2016 with file reference 2 BvB 1/13 is:

```
```

The additional character c indicates that this is the fourth decision with an otherwise identical ECLI.

**Federal Court of Justice**

The court code () is always BGH. The ordinal number consists of parts to . Parts and are separated by a point. The exact components of the ordinal number are explained in detail below.

Exact date of decision in the format ddmmyy.

Abbreviation for the type of decision (U for judgment (Urteil), B for ruling (Beschluss), V for order (Verfügung), S for other).

Main file reference (consisting of the division identifier, the register reference, the entry number and the year of entry in the format yy). There are no spaces between the division identifier and the register reference, nor between the register reference and the entry number. The slash between the entry number and the year of entry is replaced with a point.

An additional distinguishing character (assigned consecutively from 0 to 9) is always used when several decisions of the same type are handed down with the same date and file reference.

Example:
The ECLI for the ruling of the Second Criminal Division of the Federal Court of Justice of 15 March 2016 with file reference 2 StR 487/15 is:

```
ECLI: DE: BGH: 2016: 150316: B: 2STR487.15: 2
```

The additional character 2 indicates that this is the third decision with an otherwise identical ECLI.

**Federal Administrative Court**

The court code () is always BVerwG. The ordinal number consists of parts to . Parts and are separated by a point unless the file reference suffix D (judicial protection in the event of excessively long legal proceedings) has been assigned, in which case there is no point between the file reference () and the additional distinguishing character (). The exact components of the ordinal number are explained in detail below.

Exact date of decision in the format ddmmyy.

Abbreviation for the type of decision (U for judgment (Urteil), B for ruling (Beschluss), G for order (Gerichtsbescheid)).

Main file reference (consisting of the division identifier, the register reference, the entry number and the year of entry in the format yy). Older file references have a slash between the entry number and the year of entry; in ECLIs, this slash is replaced with a point.

An additional distinguishing character (assigned consecutively from 0 to 9) is always used when several decisions of the same type are handed down with the same date and file reference.

Example:
The ECLI for the judgment of the Ninth Division of the Federal Administrative Court of 17 April 2002 with file reference 9 CN 1/01 is:

```
```

**Federal Fiscal Court**

The court code () is always BFH. The ordinal number consists of parts to . Each part is separated from the others by a point. The exact components of the ordinal number are explained in detail below.

Abbreviation for the type of decision:

<table>
<thead>
<tr>
<th>VE</th>
<th>Request to the Court of Justice of the EU for a preliminary ruling</th>
</tr>
</thead>
<tbody>
<tr>
<td>VV</td>
<td>Submission to the Federal Constitutional Court</td>
</tr>
<tr>
<td>BA</td>
<td>Ruling in proceedings for interim measures:</td>
</tr>
<tr>
<td></td>
<td>application for suspension of enforcement [A1] and appeal against</td>
</tr>
<tr>
<td></td>
<td>a decision to suspend enforcement [A2]</td>
</tr>
<tr>
<td>B</td>
<td>Ruling, except where BA is to be assigned</td>
</tr>
<tr>
<td>U</td>
<td>Judgment, legally binding court order, interlocutory order, etc.</td>
</tr>
</tbody>
</table>

Exact date of decision in the format ddmmyy.

Main file reference (consisting of the division identifier, the register reference, the entry number and the year of entry in the format yy). There are no spaces between the division identifier and the register reference, nor between the register reference and the entry number. The slash between the entry number and the year of entry is replaced with a point.

An additional distinguishing character (assigned consecutively from 0 to 9) is always used when several decisions of the same type are handed down with the same date and file reference.
Example:
The ECLI for the judgment of the Tenth Division of the Federal Fiscal Court of 1 June 2016 with file reference X R 66/14 is:

Federal Labour Court
The court code () is always BAG. The ordinal number consists of parts to . Each part is separated from the others by a point. The exact components of the ordinal number are explained in detail below.

Exact date of decision in the format ddmmyy.
Abbreviation for the type of decision (U for judgment (Urteil), B for ruling (Beschluss)).
Main file reference (consisting of the division identifier, the register reference, the entry number and the year of entry in the format yy). There are no spaces between the division identifier and the register reference, nor between the register reference and the entry number. The slash between the entry number and the year of entry is replaced with a point.
An additional distinguishing character (assigned consecutively from 0 to 9) is always used when several decisions of the same type are handed down with the same date and file reference.

Example:
The ECLI for the judgment of the Tenth Division of the Federal Labour Court of 7 January 2015 with file reference 10 AZB 109/14 is:

Federal Social Court
The court code () is always BSG. The ordinal number consists of parts to . The parts are not separated in any way. The exact components of the ordinal number are explained in detail below.

Exact date of decision in the format ddmmyy.
Abbreviation for the type of decision (U for judgment (Urteil), B for ruling (Beschluss)).
Main file reference (consisting of B for Federal Social Court, the division identifier, the field identifier, the number of the entry in the relevant field and the associated register, the year of entry in the format yy and the register reference). Non-alphanumeric components of the file reference are omitted.
An additional distinguishing character (assigned consecutively from 0 to 9) is always used when several decisions of the same type are handed down with the same date and file reference.

Example:
The ECLI for the judgment of the Third Division of the Federal Social Court of 25 January 2017 with file reference B 3 P 2/15 R is:

Courts of the Länder
The admissible court codes () are listed in the attached table. The ordinal number consists of parts to . Each part is separated from the others by a point. The exact components of the ordinal number are explained in detail below.

Exact date of decision in the format mmdy.
File reference (or file references, if there are multiple file references) of up to 17 characters, beginning with the first character of the main file reference. If there is a point after the 17th character, this point is omitted. Umlauts are replaced (ä = AE, ö = OE, ü = UE) and non-alphanumeric characters such as spaces or slashes are omitted. If numbers or letters would be displayed next to each other, they are separated by a point (e.g. 9 C 1023/12 becomes 9C1023.12).
An additional two-digit distinguishing code (assigned consecutively from 00 to 99) is always used when several decisions of the same type are handed down with the same date and file reference.

Example:
The ECLI for the decision of the Sixth Grand Chamber for Economic Offences of Stuttgart Regional Court of 26 January 2015 with file reference 6 K Lars 34 Js 2588/10 is:

ECLI: DE: LGSTUTT: 2015: 0126: 6KL34JS2588.10: 00

European Case Law Identifier (ECLI) - Estonia

Since 2018 it has been possible to search Estonian case law that has been published and is in force by using ECLI, the European Case Law Identifier. It is easier and quicker to find Estonian case law using the identifier. The adoption of the ECLI also supports the implementation of open data policies. The ECLI has also been added to the metadata page for case law, which opens in the search results.
The ECLI has been added to all Supreme Court and county and district court case law since the second half of 2016. Published case law has been given an ECLI since the second half of 2016, and the number is made up of five components separated by a colon (for example ECLI:EE:RK:2016:1.16.2798.84).

ECLI – European Case Law Identifier; EE – country identifier; RK – court identifier; 2016 – year of publication; 1.16.2798.84 – (e.g. 1-16-2798/84) in the number of the court case, the symbols '-' and '/' are replaced by dots and the sequential control number '84' is added at the end.

The ECLI number can also be used as a URL and searches can be performed using the following logic (where 'kohtulahendid' means 'case law'):

…/kohtulahendid/ecli/ECLI:EE – all case law with an ECLI

…/kohtulahendid/ecli/ECLI:EE:RK:2016:1.16.2798.84 – a specific Supreme Court judgment

The court identifiers are as follows:

RK – Supreme Court
TRK – Tallinn District Court
TLHK – Tallinn Administrative Court
TRK – Tartu Administrative Court
HMK – Harju County Court
PMK – Pärnu County Court
TMK – Tartu County Court
VMK – Viru County Court

**European Case Law Identifier (ECLI) - Greece**

Greece currently participates in the ECLI system, with the [Council of State](https://www.cgpj.es) (Sýmvoúlio tis Epíkratéias).

There is no unified electronic database containing all domestic court rulings.

There are several electronic case law databases on the web, relating to:

- [Hellenic Supreme Court](https://www.ecli.gr) (Areíos Págos), containing only its own case law
- [Council of State](https://www.ecli.gr) (Protódikeío Peiraiós), containing administrative court rulings
- [Piraeus Administrative Court of First Instance](https://www.ecli.gr) (Protodikeío Peiraiós), containing only its own case law.

There are also private subscription databases.

For example:
- of the [Athens Bar Association](https://www.dikigorikos-sylogos-athinon.gr) (Dikigorikós Sýlogos Athinón)
- of the company [Intracom Services](https://www.intracom-services.gr) (private)

**European Case Law Identifier (ECLI) - Spain**

**National ECLI coordinator**
The National ECLI coordinator is CENDOJ (CENTRO DE DOCUMENTACION JUDICIAL), the Centre for Judicial Documentation, a technical body in Spain's General Council of the Judiciary: [cendoj.ecli@cgpj.es](mailto:cendoj.ecli@cgpj.es).

**Country code**
The code for Spain is: [ES]

**Creation of the national ECLI**
The ECLI was introduced in Spain in November 2012.

This was possible because, since the start of the ECLI Project on 27 October 2011, case law in Spain already had a national identifier, called the ROJ (**Repositorio Oficial de Jurisprudencia**) - the Official Case Law Repository, which identifies the decisions handed down by all the Spanish courts, from the Courts of First Instance to the Supreme Court.

Through the website [https://www.poderjudicial.es](https://www.poderjudicial.es), we offer all citizens open access to the decisions handed down by all the Spanish courts, consisting of a total of 5 600 000 judgments, a number which increases every year. Judges/Senior Judges, Prosecutors and Court Clerks have access in a restricted environment with additional information and hyperlinks to the case law of the Constitutional Court (Tribunal Constitucional), the European Court of Justice, as well as national and international legislation and doctrine: [https://www.poderjudicial.es](https://www.poderjudicial.es).
We currently maintain the ROJ national identifier - the Cendoj ID - as the official body for the dissemination of Spanish case law, and the ECLI at European level. On the e-justice portal, we therefore have, as of 2014, 2,500,000 decisions of the Supreme Court (Tribunal Supremo), the National High Court ( Audiencia Nacional), the High Courts of Justice (Tribunales Superiores de Justicia) and Provincial Courts (Audiencias Provinciales), as well as a selection of judgments from the Courts of First Instance (Primera Instancia) that are of legal interest or have social impact. The number of decisions increases every day as they are uploaded into the system. The ECLI integration process was successfully completed in Spain, and we are currently a partner in the BO-ECLI project.

The ECLIs in Spain consist of the following fields:

'ECLI':
The country code: ‘ES’
The court code: an acronym to indicate the court in which the judgment was given. – see the section ‘ECLI court codes’;
The year of the decision;
A serial number, which in the case of Spain is the sequential number of the ROJ national identifier. This means that once a judgment has been assigned its ROJ, it is possible to automatically assign to it its corresponding ECLI.
Furthermore, in the case of Orders (Autos), the letter ‘A’ is added to the end of the sequential number.

EXAMPLES:

1) Judgment of the National High Court of 30 May 2014. Criminal Court, with ROJ SAN 2389/2014
The corresponding ECLI will be:

ECLI:ES:AN:2014:2389

The corresponding ECLI will be:

ECLI:ES:TSJCL:2011:782

Order of the National High Court Chamber for Criminal Matters of 29 October 2015, with ROJ: ANN 199/2015
The corresponding ECLI will be:

ECLI:ES:AN:2015:199A

ECLI court codes:

In Spain, the court code for the ECLI is represented using the acronym of the court that issued the judgment and which corresponds with that used in the judgment’s ROJ national identifier.

European Case Law Identifier (ECLI) - France

National ECLI Coordinator

The Office of Legal and Administrative Information (Direction de l’information légale et administrative (DILA)) has been designated as the national ECLI coordinator for France by the General Secretariat of the Government.
Country code
The country code for France is: [FR]

Generation of national ECLI
The French supreme courts covered by the ECLI system are:
- the Constitutional Council (le Conseil constitutionnel);
- the Court of Cassation (la Cour de cassation);
- the Council of State (le Conseil d'Etat).

ECLIs are made up of five components, the first two of which are constants for a Member State:
ECLI:FR:{Court_code}:{year when decision was rendered}:{ordinal number}

Each of the three courts has adopted a court code and rules for creating an ordinal number.
The year in which the decision was handed down is always made up of four numerical characters (in the format YYYY, for example 2012).

1. The Constitutional Council
The court code is always CC.
The generic form of an ECLI is therefore:
ECLI:FR:CC:{year of decision}:{ordinal number}
The ordinal number is in two parts, separated by a full stop:
- the serial number within each type of decision (which starts again at 1 every year);
- the type of decision (DC, QPC, AN... [see list of types]).

For example:
the ECLI for the decision of Friday 27 July 2012 No 2012-270 QPC would be ECLI:FR:CC:2012:2012.270.QPC.

2. The Court of Cassation
The court code is always CCASS.
The generic form of an ECLI is therefore:
ECLI:FR:CCASS:{year of decision}:{ordinal number}
The ordinal number is made up of two elements, written without a break:

The ECLI code for the division of the court (two alphanumerical characters as laid down in the table below):

<table>
<thead>
<tr>
<th>Code</th>
<th>French Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>AP</td>
<td>Assemblée plénière (Full Court)</td>
</tr>
<tr>
<td>AV</td>
<td>Avis (Opinion)</td>
</tr>
<tr>
<td>C1</td>
<td>Première chambre civile (First Civil Division)</td>
</tr>
<tr>
<td>C2</td>
<td>Deuxième chambre civile (Second Civil Division)</td>
</tr>
<tr>
<td>C3</td>
<td>Troisième chambre civile (Third Civil Division)</td>
</tr>
<tr>
<td>CO</td>
<td>Chambre commerciale (Commercial Division)</td>
</tr>
<tr>
<td>CR</td>
<td>Chambre criminelle (Criminal Division)</td>
</tr>
<tr>
<td>MI</td>
<td>Chambre mixte (Joint Bench)</td>
</tr>
<tr>
<td>OR</td>
<td>Ordonnance du premier président (Order of the President)</td>
</tr>
<tr>
<td>SO</td>
<td>Chambre sociale (Social Division)</td>
</tr>
</tbody>
</table>

The code is based on the use of an internal administration number, which itself has eight characters:
- a one-character code identifying the division of the court;
- two digits for the year of the decision;
- a five-digit serial number running within that year for the division of the court in question.

Example: the appeal number of the judgment of the Court of Cassation, Criminal Division, of 27 February 2013, is 12-81.063 and the administration number is C1300710. The first part of the ordinal number of this judgment will be CR, for the Criminal Division.

The last five digits of the administration number.
In our example, the second part of the ordinal number will be 00710. Altogether, the ECLI of the judgment handed down by the Criminal Division of the Court of Cassation on 27 February 2013, under the appeal number 12-81063, will be ECLI:FR:CCASS:2013:CR00710.

3. The Council of State
The Council of State uses a court code which identifies the type of division of the court: the root CE is followed without a break by a number of letters as shown below:

<table>
<thead>
<tr>
<th>Code</th>
<th>French Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>CE</td>
<td>Assemblée (Assembly of Presiding Judges)</td>
</tr>
<tr>
<td>CED</td>
<td>Ordonnance (Order)</td>
</tr>
<tr>
<td>CEDR</td>
<td>Section du contentieux (Disputes Division)</td>
</tr>
<tr>
<td>CES</td>
<td>Sous-section jugeant seule (Subdivision ruling alone)</td>
</tr>
<tr>
<td>CESJ</td>
<td>Sous-sections réunies (Subdivisions sitting together)</td>
</tr>
<tr>
<td>CJS</td>
<td>Chambre jugeant seule (Chamber ruling alone)</td>
</tr>
<tr>
<td>CJSR</td>
<td>Chambres réunies (Chambers sitting together)</td>
</tr>
</tbody>
</table>

The code CE is not used on its own.
The generic form is therefore:
ECLI:FR:CE:{year of the decision}:{ordinal number}
The ordinal number is also made up of two parts, separated by a full stop:
- the application number of the decision;
- the date of the delivery of the decision, in the format YYYYMMDD.

For example:
the ECLI of Council of State decision No 355099 of 1 March 2013, delivered by the third and eighth subdivisions sitting together, would be: ECLI:FR:CESSR:2013:355099.20130301

European Case Law Identifier (ECLI) - Croatia

On 18 January 2017 the Republic of Croatia started to apply the European Case Law Identifier (ECLI) to court decisions in the database of case law which is kept at the Supreme Court of the Republic of Croatia (Vrhovni sud Republike Hrvatske), and which could previously be consulted only on the Supreme Court's website. The fact that all publicly available court decisions are given an ECLI means that they are publicly available through the search engine of the European e-Justice Portal – ESE EEJP. This makes it easy for citizens and legal practitioners from other EU Member States to search the database for decisions of Croatian courts, and for Croatian citizens and legal practitioners to consult decisions of courts of other Member States.

National ECLI Coordinator

The national ECLI coordinator has not yet been appointed. For the time being the Ministry of Justice’s Directorate General for Automated Information Systems (DGSIA) is acting as coordinator.

Country code

The country code for Italy is: [IT].

Generation of national ECLI

As part of the current pilot phase activities, a proposal for the introduction of ECLI is being drawn up. More particularly, rules are being drawn up on the composition of the ordinal number for case-law documents, as stipulated in the ECLI standard, using a set of accessible metadata in order to guarantee that each identification number is unique.

European Case Law Identifier (ECLI) - Latvia

National ECLI Coordinator

The National ECLI coordinator is the Courts Administration (Tiesu administrācija).

Contact e-mail: pasta@ta.gov.lv

Country code

The country code of Latvia is: [LV]

Generation of national ECLI

In Latvia, ECLI was introduced in September 2017. ECLI is attributed to all court rulings registered in the Court Information System, except for rulings adopted in the form of resolutions and decisions by investigating judges. Publicly available rulings are published on the website https://www.elieta.lv/web/.

Structure of the elements in the Latvian ECLI code

ECLI:LV:AAAAAAA.BBBB.CCDD.E12345678.90.FF, where

- ECLI is an invariable designation of the European Case Law Identifier;
- LV is an invariable country code: international code of the Republic of Latvia;
- AAAAAA is court code;
- BBBB is year of the ruling;
- CCDD.E12345678.90 is a consecutive number of the ruling, where CC two digits of the month the ruling was adopted;
- DD two digits of the day the ruling was adopted;
- E12345678 is case number or, where there is no case number, the archive number or file number of the application;
- 90 is sequential number of the ruling within the case or in the context of examining a claim, if there is no case number;
- FF type of ruling (RS (assignments sitting), L (decision), S (judgment), BL (incidental ruling)).
For example: Ruling ECLI:LV:RAT:2016:1201.C28087609.1.S (where ECLI stands for the European Case Law Identifier, LV is the international code of the Republic of Latvia, RAT is the code of the regional court of Riga (Rīgas apgabaltiesa), 2016 is the year of the ruling, 1201 is the date of the ruling (1 December), C28087609 is the case number in accordance with the procedure set out in this chapter; 1 is the sequential number of the ruling, and S means the type of ruling is a judgment).

European Case Law Identifier (ECLI) - Netherlands

National ECLI coordinator

The national ECLI coordinator is the Council for the Judiciary (Raad voor de rechtspraak). You can contact the coordinator at the following email address: [kennissystemen@rechtspraak.nl]

Country code

The country code for the Netherlands is: [NL]

Generation of national ECLIs

The ECLI was introduced in the Netherlands on 28 June 2013. An ECLI can be allocated to:

- all judicial decisions published on the website of the Council for the Judiciary:
  - all disciplinary decisions published on the official website (on the joint disciplinary website);
  - all judicial decisions not published on the websites under (a) and (b) but published in magazines or databases, and judicial decisions published commercially as ‘open access’. Magazine editors or database managers who wish to register their decisions can do so via the above email address;
  - all judicial decisions kept in an internal database of the Council for the Judiciary.

Regardless of whether the decision itself is published on one of the two websites referred to above, all Dutch ECLIs, together with at least the name of the body that delivered the decision, the date of the decision and the case number, can be found on [rechtspraak.nl].

Where known, publication references are also given for any reports of the decision in journals or databases. Dutch ECLIs are made up of the following:

- ECLI;
- country code ‘NL’;
- court code (see under the heading ECLI court codes (Gerechtscode);
- year of the decision;
- a serial number. There are two possible formats.

Before 28 June 2013, virtually all decisions published in the Netherlands were given a country case number (Landelijke Jurisprudentie Nummer, LJN). This LJN always consisted of two letters and four figures, e.g.: ‘AB1234’. For reasons of consistency, this LJN has been included as the fifth part of the ECLI code. As of 28 June 2013, LJNs are no longer allocated. All decisions given an ECLI after that date have an ascending serial number consisting solely of figures. This may also be the case for decisions issued before 28 June 2013.

The most important court codes

The Netherlands has a large number of law courts. The codes of the most important Dutch courts are listed in the table below.

The country code for Portugal is: [PT].

**Generation of national ECLI**

Portugal’s introduction of the European Case Law Identifier (ECLI) was completed in November 2018, as part of a project co-financed by the European Union through the Justice Programme 2014-2020 of the Directorate-General for Justice and Consumers (DG JUST). This was a joint initiative of the Supreme Council of the Judiciary (Conselho Superior da Magistratura) and the Institute for Financial and Estate Management of Judicial Services (Instituto de Gestão Financeira e Equipamentos da Justiça).

The ECLI currently covers judgments of the higher courts:
The Supreme Court of Justice (Supremo Tribunal de Justiça)
The Coimbra Court of Appeal (Tribunal da Relação de Coimbra)
The Évora Court of Appeal (Tribunal da Relação de Évora)
The Guimarães Court of Appeal (Tribunal da Relação de Guimarães)
The Lisbon Court of Appeal (Tribunal da Relação de Lisboa)
The Porto Court of Appeal (Tribunal da Relação do Porto)

The ECLI in Portugal is made up of the following components:

- **ECLI:**
  - The country code: ‘PT’;
  - The court code: ‘STJ’, ‘TRL’, ‘TRP’, ‘TRC’, ‘TRE’ or ‘TRG’ (the ECLI is currently available to identify judgments of the Supreme Court of Justice and the appeal courts of Lisbon, Porto, Coimbra, Évora and Guimarães);
  - The year of the judgment;
  - A serial number, which in Portugal’s case, is based on the case number (plus occasionally two identifying characters used for the distribution of cases in the higher courts).

Each component is separated by a colon.

Example of a Portuguese ECLI:
The identifier **ECLI:PT:TRC:2017:198.15.3GCACB:C1**, corresponds to a judgment handed down in Portugal (PT), by the Coimbra Court of Appeal (TRC), in 2017, in case No 198/15.3GCACB.

**National ECLI coordinator**
The Ministry of Justice is the national ECLI coordinator – [dti@just.ro](mailto:dti@just.ro)

**Country Code**
The Country Code for Romania is [RO]

**Generation of national ECLI**

ECLI was introduced in Romanian courts at the end of 2015.

The ECLI is automatically assigned, using the electronic case management system (ECRIS), to judgments handed down since 2007 by the courts (High Court of Cassation and Justice, appeal courts, tribunals and district courts). For judgments handed down after 15 December 2015, ECLI also appears in paper format.

At the moment there is no online database of national case law base connected to the ECLI search engine within the e-Justice Portal. However, there is a database in which all judgments handed down by Romanian courts in 2010 are taken from the ECRIS system and published in anonymised form - [ROLII](https://rolii.jud司.ro), currently under development.

In Romania the ECLI code consists of:

- ‘ECLI’;
- country code ‘RO’;
- court code - a list of court codes can be found [here](https://rolii.jud司.ro); a serial number, consisting of the internal number of the corresponding electronic register in the ECRIS system (unique to the court) and the judgment number as granted in the court decision register (unique to the register).

**Example:**
The ECLI code assigned to a judgment delivered by District Court of Bucharest 4 could look like this: **ECLI:RO:JDS4B:2017:001.004053**, where ‘JDS4B’ is the court code, ‘2017’ – the year of the judgment, ‘001’ – the internal number of the corresponding electronic register in the ECRIS system and ‘004053’ is the judgment number.

Country code
The country code for Slovenia is: [SI]

Generation of national ECLI
On 1 October 2011, Slovenia introduced an ECLI as an integral part of all existing documents published in the case law databases of its courts. All new documents which are entered into case-law databases also receive an ECLI. An ECLI will also be included in all new judicial decisions in the near future. All ECLIs are created automatically on the basis of the existing data. All known private publishers of case law documents have been informed about the ECLI, and most of them have already assigned an ECLI to published documents.

Court codes:
VSRS: Supreme Court of the Republic of Slovenia (Vrhovno sodišče Republike Slovenije)
USRS: Constitutional Court of the Republic of Slovenia (Ustavno sodišče Republike Slovenije)
VSCe: Higher Court in Celje (Višje sodišče v Celju)
VSKP: Higher Court in Koper (Višje sodišče v Koprju)
VSLJ: Higher Court in Ljubljana (Višje sodišče v Ljubljani)
VSMB: Higher Court in Maribor (Višje sodišče v Mariboru)
UPRS: Administrative Court of the Republic of Slovenia (Upravno sodišče Republike Slovenije)
VDSS: Higher Labour and Social Court (Višje delovno in socialno sodišče)

Note: Court codes consist of four letters. The list of participating courts currently only applies to appellate courts, the Supreme Court and the Constitutional Court of the Republic of Slovenia, whose decisions are already published in national case law databases. Other courts and institutions will be added in the near future.

Year of decision:
The year in which the decision was issued is used (YYYY entry).

Reference number:
The regular ordinal number (hereinafter: RON), e.g. II Ips 123/2005) of a particular court (datafield: Odločba (=decision)) is used as the basis for the formation of the ECLI ordinal number (hereinafter: EON).

Other words (e.g. Sodba, Sklep, etc.) which may be part of the field Odločba are not considered part of RON and are to be omitted/deleted in the formation of EON.
The year, which is a part of RON, remains part of the new EON.

As regular ordinal numbers include signs such as dashes, slashes or empty spaces, each one of these is to be replaced by a period sign within the ECLI format (e.g. II Ips 123/2005 becomes II.Ips.123.2005; I K 123456/2010 becomes I.K.123456.2010, etc.).
The general rules for EON are subject to the exceptions defined in special cases below.

Special cases:
A: Where one joint decision lists two or more RONs, only the first RON is used for the formation of the ECLI. ‘.A’ is to be added at the end of EON in such cases. Other RONs can be accessed through document metadata.
Example:
Sodba II Ips 49/2008 and II Ips 28/2011
then the ECLI is:

B: Where a decision uses only one RON which is similar to a number of other decisions with different RONs, the others have not been added to the case law databases. The first RON is used for the creation of the ECLI, and the others are mentioned as ‘same as’ in the metadata. The remaining RONs are used to create ECLIs which are listed in the database as relating to similar decisions.
Example:
then ECLI is:
ECLI:SI:VSRS:2009:VIII.IPS.432.2009,
same as:
Users searching for any of these ECLIs will be directed to the same document.

C: In the past there were instances where RON of the same court could be duplicated, because the institution operated at different branches and did not have a centralized case management system (e.g. UPRS). The exact branch is identified in the metadata of a document. In such cases a ‘.letter’ combination representing the branch is to be added at the end of EON, based on the following classification:
Celje: .C
Ljubljana: .L
Nova Gorica: .G
Maribor: .M

D: Some penal (criminal law) documents in the SOVS database of the Supreme Court use two RONs in the field ‘Odločba’. The first uses the ordinal number (in the form -NN), while the other is included in brackets ( ). The reason for this is a double registration of cases during a transition phase for the introduction of a computerised criminal case management system.
In these cases only the first RON is used for the creation of the ECLI, to which the ordinal number of the case is added after the year. The other RON mentioned in brackets is discarded and does not form part of the ECLI.
In some cases several documents of the same court use the same RON, for example interim measures and final decisions. In these cases, a number is added for the purpose of EON creation. The first decision (according to date of issue) does not have a numerical addendum. The next one receives addendum ‘1’, the subsequent one ‘2’, etc. Addenda are assigned automatically based on the date when the document was issued.

Example: Sklep G 6/2011 (note: duplicated in a number of documents) then the ECLIs are:
etc.

European Case Law Identifier (ECLI) - Slovakia

National ECLI coordinator
The national ECLI coordinator is Aki Hietanen at the Finnish Ministry of Justice. E-mail address: ecli@justice.sk

Country code
The country code for the Slovak Republic is: [SK]

Generation of national ECLI code
An ECLI code is generated when a judgment is delivered. Only judgments delivered after 25 July 2011 are given an ECLI number. If a judgment delivered before 25 July 2011 is appealed after 25 July 2011, this and all other judgments in that file are also given an ECLI code.

Example of an ECLI code for the Slovak Republic:
OSBA1 = abbreviation for the court
2011 = year
0123456789 = IČS (file identification number)
123 = serial number of judgment in the file

European Case Law Identifier (ECLI) - Finland

Finland will use the European Case Law Identifier (ECLI) in all case law databases in Finlex, the national legal databank.

National ECLI coordinator
The national ECLI coordinator is Aki Hietanen at the Finnish Ministry of Justice. E-mail address: finlex@om.fi.

Country code
The country code for Finland is [FI].

Generation of the national ECLI
Finland will use the European Case Law Identifier (ECLI) in all case law databases in Finlex, the national legal databank. Use of the identifier was initially tested on the case law databases of the Finnish Supreme Court (korkein oikeus) and the Supreme Administrative Court (korkein hallinto-oikeus). The identifier will also be used in the databases of the Courts of Appeal (hovioikeudet), the administrative courts (hallinto-oikeudet) and the special courts (entistyuomioistuinten).

In 2017, metadata in the judgments will be enriched with ECLI metadata. Metadata from the Dublin Core Metadata Initiative are already being used in Finlex’s case law databases.

The ECLI is also used in Finlex’s case law literature database, which contains references to court decisions from Finnish legal literature since 1926. Case law consists of judgments of, among others, the Finnish Supreme Court, the Supreme Administrative Court, the Courts of Appeal, the European Court of Human Rights and the Court of Justice of the European Union.
